RECENT PROJECTS

Eyeland Framez (in-progress client project)

eyelandframez.com | [git](#)

- E-Commerce web application showcasing a wide range of retail fashion eye-wear.
- Node.js REST API used to fetch user and product data from MongoDB storage.
- Uses Stripe for purchasing, JSON Web Tokens for authentication & Redux for state management
- Developed admin CMS to display transaction and user data with controls to update and add products, and manage featured items and sales.

Kijiji Rental Mapper

kijijimapper.netlify.app | [git](#)

- App to curate and geographically visualize rental properties through web scraping
- Developed REST API with Node.js and Express.js to fetch user-filtered data from Kijiji
- React.js, Material UI, react-spring, MapBox libraries used to dynamically display client-side data

Toronto Social App

mapto.herokuapp.com | [git](#)

- A location based social media app implementing posts, comments, likes on an interactive map
- Utilizes Passport for user authentication, algorithms and EJS for displaying all of the data
- Used MongoDB and Mongoose ODM for storing user generated data in schemas
